Description

Description

It features a mechanical design with three independent lens control rings: focus, iris, and zoom. Each ring incorporates a cine-style gear with a 0.8 MOD for interfacing with standard cine -style lens accessories. The focus ring features approximately 200° of rotation, which provides room or precise focus pulls, and the iris is clickless, enabling smooth iris pulls. The lens also incorporates a macro mode for close focusing capabilities.

The lens is color matched to other Fujinon lenses such as the HK, ZK, and XK series, which enables

smooth intercutting between lenses. The 85mm front enables use with many cine-style matte boxes via use of optional step up rings (rings not included). The lens weighs only 2.16 pounds, which is fairly light for a cinema zoom that holds focus and aperture throughout the focal length range. It is designed for camera's with a Sony E-mount, so it has a short flange focal distance, but the lens allows for flange focal distance adjustment so you can fine tune it to the camera you are using the lens on.

Specifications

Model name	FUJINON MK18-55mm T2.9
Focal length	18-55mm
Zoom ratio	3.0 x
F-No.	F2.75
T-No.	T2.9
Image size	24.84mm x 13.97mm(?28.5mm)
Minimum Object Distance (M.O.D.)	0.85m/2ft 9in (0.38m/1ft 2.9in in the macro mode)
Object dimensions (at M.O.D.)	18mm : 924mm x 520mm
[Horizontal x Vertical] 16:9 aspect ratio*10	55mm : 291mm x 164mm
Angle of view	18mm : 69.2°x 42.4°
[Horizontal x Vertical] 16:9 aspect ratio*10	55mm : 25.5°x 14.5°
Number of iris blades	9
Filter diameter	82mm
Front diameter	85mm
Length	206.3mm
Weight (approximate)	980g
Lens mount	E mount
